

TB and AIDS : **India and Canada's Response to** **the Global Emergency**

Please join us for an evening of awareness-raising and relationship-building with officials from India and leaders from Toronto's Indo-Canadian Community.

To mark the 2006 International Aids Conference, the Toronto-Calcutta Foundation and RESULTS Canada are hosting an awareness-raising event for Canadians and guests from India to share the incredible progress and ongoing struggle in the fight against the TB, HIV and AIDS epidemics in India.

According to UNAIDS, India has 5.7 million people living with HIV – more than any other country in the world. There is a deadly synergy between HIV/AIDS and TB.
